OPEN SCIENCE IN THE CLASSROOM

Wednesday, March 25, 2020
12:00 - 12:50 pm
Lab 2

David Páez, PhD Candidate of Linguistics

Doing science may be hard, but it is also a fun and joyful experience. This workshop is designed to help you navigate the scientific process in a natural and meaningful way. We will learn how to create foundations for scientific thought, how to connect the pieces of the scientific method "puzzle", and how to use and stimulate scientific thinking in the classroom. Instructors and students welcome.

Light refreshments will be served.
