

INTERACTIVE ASSESSMENT IN ADVANCED RUSSIAN LANGUAGE CLASSES

Monday, April 9, 2018 from 1:00 - 2:00
Language Learning Center, Lab 1

Tanya Ivanova-Sullivan, Department of Foreign Languages & Literatures

In this presentation I will discuss LinguaFolio, an online assessment tool designed to measure language progress in a more interactive way. I will focus on the Self-Reflection feature of LinguaFolio by presenting data on the type of materials students upload for evaluation and the review process. I will also make some suggestions about facilitating student learning and engagement in formative and summative e-assessment based on their individual needs and interests.
